

How to Resize and Print an Image for Maggie Dillon Designs Textile Collage Technique

1. Open your image in Paint
2. In the “HOME” menu, click “RESIZE.” The “RESIZE and SKEW” menu will appear.

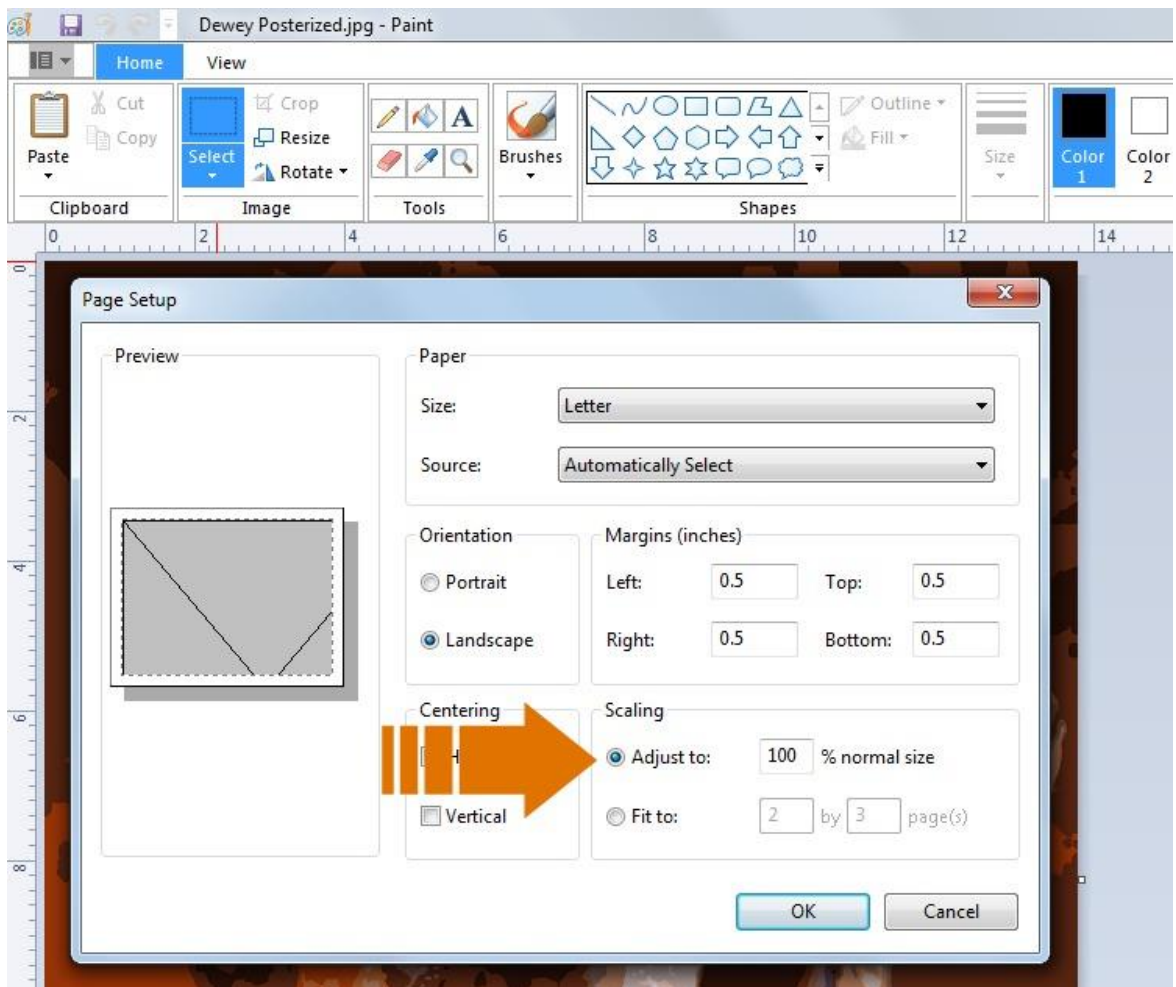

I keep the “PERCENTAGE” option selected and I enlarge to the size I want. You can keep resizing until you are happy with your image. (There are rulers along two sides of the program so that you can see the accurate size of your image.

3. In the file menu, hover over PRINT then select “PAGE SETUP”

4. Once the menu appears, select “ADJUST TO 100%.” Click “OK.” This will print your image on multiple sheets of paper.

5. Go back to the file menu and select “PRINT.”
*** (If you'd like to save ink, select the “PREFERENCES” button and change to “FAST/ECONOMICAL PRINTING.” Select “OK” then “APPLY” then “PRINT.”)
